

Serial No. 09/634,501  
Docket No. NEC00P244-as

**AMENDMENT TO THE SPECIFICATION**

Please amend the paragraph commencing at page 9, line 18 as follows:

A<sup>1</sup>  
The IC card 1 is a combined IC card that operates selectively in two modes, i.e., a terminal mode and an RF mode. It IC card 1 is formed as a plastic card that is removably insertable in a wired card reader (not shown) that is used when the IC card 1 is in the terminal mode. The IC card 1 has a microprocessor ~~101~~100 as its main component.
